

Additional Network Adequacy Analysis – Mental Health

A request was submitted to the Division of Insurance to break out the individual specialty codes which make up mental health providers and analyze the network adequacy of each specialty code using the mental health time and distance standards. In addition the Council requested that the network adequacy of psychiatry be analyzed using the same standards as a specialist such as Endocrinology, specialty code 012. Analysis was done using the master provider list for plan year 2017. In addition to the time and distance analysis, a breakdown of the provider counts for specialty code 029, psychiatry, is provided based on licensed providers as well as the contracted providers reported for the 2017 plan year.
