Jeremy,

on page 4 bottom of page, please add the item in red:

“The current NAAC recommendation for Plan Year 2019 would be equivalent to the requirements outlined in the CMS Letter to Issuers for Plan Year 2018, with the exception of returning to a 30% standard for ECPs ***and keeping Pediatrics as a stand alone requirement as it is for Plan Year 2018.***”

Otherwise this document looks fine to me.

Thanks,

Howard Baron, MD
