

## **VISION for NEVADA'S NETWORK ADEQUACY ADVISORY COUNCIL (NAAC)**

What would be possible what would be different about how Nevada's Healthcare network operates for Nevada's communities and people--if the Council was 100% successful in getting Network Adequacy to its highest potential?

***Standards are pragmatic, achievable and meaningful.***

***We have:***

1. maximized access for consumers with adequate workforce and providers cost containment.
2. validated data about whether providers are available.
3. Access\* to care
4. Access to insurance.
5. Maximized health and wellness.
6. Educated consumers so that, whether their health needs are emergent or non-emergent:
  - a. Consumers know how to use their network care, are informed and access care appropriately.
7. Contributed to health literacy: transparent to consumer.
8. Provided care that is culturally and linguistically appropriate.
9. Influenced the other 80% of non-regulated plans.

\* Access to care—consumer can utilize their health plan benefits; Access refers to clinical best practice.
