

Hi Adam

Thank you for taking the time to talk to me on the phone today. I wanted to share my feelings on habilitative care services in Nevada. I am the mother of a child with physical disabilities. I am concerned about the lack of definition of habilitative care services in the current benchmark insurance plan options. It is confusing and misleading to families who are thinking that there will be no coverage at all. It is also worrying that these essential services are considered debatable when they are not only extremely valuable to the individual and family who receives them, but it has been supported by data that therapy services provided to children increases quality of life and decreases eventual costs to the state. Please consider children with physical disabilities when it comes time to choose habilitative care services for the benchmark plans for Nevada and choose to provide them with the services that they need.

Thank you

Nora Behrens
