

Please accept this email is my written comments on the plan selection which are due today. I submit them on behalf of the Legal Aid Center of Southern Nevada. My understanding is that one of the PEB plans (I believe it is the PPO) has removed the age and dollar limit restrictions on autism services. It's my understanding that that change is not in your comparison chart because it did not exist in January 2014. However since the \$36K restrictions in the plan at that time and since the ACA forbids monetary limits I believe that that removal (at least as to the monetary limit) would not be considered a new mandate nor result in federal financial penalties.

If it is possible legally to adopt this higher benefit as part of Nevada's EHB I would request choosing the appropriate PEB plan.

Thanks

Jon Sasser
